After a few days of using the unit, I was unable to sync with my desktop PC. I called Dell customer service on a Sunday and got help in a reasonable amount of time. The rep. solved my problem, and the unit has been working perfectly ever since. Considering the number of complaints about Dell customer service on this site, I was suprised at this, but it was no problem. I gave a five star rating because it is a very useful product, it works well, I had a good experience with customer service, and you get alot for your money. Got the pda early. The item arrived in good condition, and works fine. I can read docements on it, study the Bible with separate special software, and keep track of meetings, as well as carry photos with me. I am pleased with this product. I was sold by the larger screen and disappearing grafitti area not to mention the price of the Axim. Bought the Axim after much thought and fear, but Im pleased. I really like the full integration with Outlook including email all in the same program and the added flexibility of Tasks and Phonebook. The sync though seems to be a bit more
